

LANTERN ... GAMES THAT SHINE

# LANTERN

## HUNCHBACK HAVOCK

Egor the hunchback has got himself locked inside his master's updated nuclear powered castle wherein there are jewels for the taking. The reactor, however, keeps bubbling over and poor Egor has to keep rushing back and forth in lifts and buggies unlocking doors and stamping out fires, gas leaks, electrical faults, in fact you name the trouble and he's got it, its absolute havock! With four different castles and twenty-four different sheets this has to be the ultimate game in console Basic.
